

Thanaphon Kallaprapruek

Software Developer | Bangkok, Thailand | 0636749204 | thanaphon@we-stride.com

About

I am a Full Stack Developer with extensive experience in web and software development. I have a strong background in both front-end and back-end technologies and am skilled in various frameworks and tools. I am passionate about developing efficient and scalable solutions.

Experience

Zicure Corporation

Senior Full Stack Developer

Bangkok, Thailand

Oct '21 - Present

- Spearheaded the development and maintenance of high-performance web applications using React, Next.js, Nest.js, CakePHP, Laravel, Docker, Kubernetes, and PostgreSQL, resulting in improved user experience and performance optimization.

WeStride Institute of Technology

Full-stack Mentor

Bangkok, Thailand

Jan '24 - Present

- Mentored and trained junior developers in full-stack development, improving team's proficiency in modern web technologies such as HTML, CSS, JavaScript, React, Express.js, and MySQL.

Education

Mahidol University

Bachelor of Arts (BA) | ReligionStudy | GPA: 3.01

Jun '15

Apply the knowledge and skills they have acquired in real-life situations.
Capable of continuous self-assessment and self-improvement.
Adapt to a variety of situations effectively.

Projects

ccdc-data-center

ccdc.consular.go.th | Centralized Consular Data Center

- Developed an internal system for the Department of Consular Affairs to handle data cleansing, export reports, and manage bans. Worked on 10 projects using CakePHP, Laravel, Express.js, PostgreSQL, and Ubuntu

ccdc-data-exchange

ccdc.consular.go.th | Centralized Consular Data Center

- Designed and implemented a data exchange system between departments using Kafka and Nest.js. The system supports high load capacity, deploys with Docker and Kubernetes (K8s), and includes load testing and webhook confirmation for client file receipt.

skt-connect

skt-connect.zi-platform.com/ | skt

- Developed a sale page system using Microservices architecture with Next.js, Nest.js, PostgreSQL, Docker, K8s, and Postman. Responsibilities included API documentation and script testing.
